The AI Authority Review

Initiative: _____ **Business owner:** _____ **Review date:** _____
Current authority: ☐ Observe ☐ Recommend ☐ Act with approval ☐ Bounded autonomy ☐ Expanded autonomy **Requested:** _____

A. Decision and authority

#	Question	Answer and evidence
1	**Business decision.** What recurring decision or state change does this system participate in?	
2	**Authority sought.** Current and requested state, for each action type	
3	**Accountable decision owner.** Who holds the right to approve, expand, restrict, or revoke? One name.	

B. Ownership and control

#	Question	Answer and evidence
4	**Business owner.** Who owns the outcome and economics?	
5	**Technical owner.** Who operates the system and owns its recovery path?	
6	**Risk owner and control functions.** Who accepts residual risk? Which functions hold an approval or veto, and what did each decide, when?	

C. Evidence Chain

Dimension	Evidence	Strength	Gap
Capability			
Decision quality			
Workflow adoption			
Human trust			
Outcome			
Economic value			
Risk			
Operational readiness			

D. Boundaries and reversibility

#	Question	Answer and evidence
8	**Demotion trigger.** What evidence would justify reducing authority, and who acts?	
9	**Cost boundary.** True cost per accepted action at production volume, against what baseline?	
10	**Market boundary.** Where was this authority earned; where would it need requalification?	
11	**Control-plane ownership.** If the vendor or model changed tomorrow, what would the enterprise keep?	
12	**Exit condition.** What evidence would trigger redesign, pause, or exit?	

Authority decision

Decided authority: _____ ☐ Expand ☐ Maintain ☐ Constrain ☐ Pause ☐ Redesign ☐ Exit
Rationale: _____
Conditions for the next authority level: _____
Decision owner: _____ **Effective date** (after the change record confirms controls): _____ **Next review:** _____

A blank field is a finding. Review for demotion as deliberately as for promotion. Expand by evidence, one state at a time. The authority owner cannot grant what a control function has blocked. Enterprise AI Decision Toolkit · github.com/ngupta1137/enterprise-ai-decision-toolkit · MIT
